

Client Feedback

I would like to recommend Ping Academy to you....We partnered twice with Ping Academy to provide Digital Literacy Training for our staff. It was important to us that the training would not only provide knowledge but also assess and prove competence. Ping Academy was able to provide this for us...

Client Feedback

The feedback we received from our staff was very positive and enthusiastic. Many of those that participated in the training came from disadvantaged backgrounds and most had none or very little experience with computers. The diligence, professionalism, patient instruction and care of the trainers made all the difference....

Client Feedback

...I am grateful to report that all the staff passed their assessments at the end of the course. In addition to mastering the training material, we have also found that these staff members have greater confidence to operate in the digital environment and consequently in themselves. We are planning to partner with Ping Academy to do the next level of computer training for our teams.
